1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on January 28, 2005 has been entered.

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Yamakawa et al (4,906,341), Schuster et al (5,000,827, Lytle et al (5,391,285) and Mori (5,443,707) all disclose apparatus for electroplating a semiconductor wafer.

REASONS FOR ALLOWANCE

3. The following is an examiner's statement of reasons for allowance: The newly presented claims are considered to overcome the rejections of record. The prior art of record does not teach or suggest apparatus for electrochemically processing a workpiece as now claimed. While prior art such as Schuster et al and Lytle et al show that apparatus having what may be considered to be a cup with a rim within a bowl is known, there is no teaching of an interstitial region and annular compartment outside the interstitial region and in communication with the

interstitial region at an elevation that is above the rim of the cup, and an outer connection that communicates with the annular compartment.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
